

Sprint 1 Report, Spotify Match, 2/2/2023

Actions to stop doing:

- We are satisfied with what we are currently doing as we all met our goals for this sprint. No one felt the tasks to be too difficult and we were able to create a cohesive initial version of the product in time.

Actions to start doing:

- We should start having more brainstorming sessions, as that is when we seem to have our best ideas. We should also start to view the product from the perspective of the user, which would help us catch app flow errors early.

Actions to keep doing:

- We will keep meeting at the frequency we are meeting, and we will continue the style of work that we have had so far as it's been successful, as evidenced by this last sprint.

Work completed/not completed:

- We completed all the work that we set for the sprint.
 - Create postgres server
 - Create picture page
 - Create express.js server
 - Connect to spotify api
 - Create home page with buttons and tabs
 - Design + create new user survey page
 - Create user cards

Work completion rate:

- 7 user stories completed
