<u>**Sprint 4 Plan**</u>
<u>**Spotify Match, Team rocket, 3/2/2023**</u>

<u>**Goal:**</u>

<u>**User stories:**</u>

- As a person, I would like to navigate from one screen to another. Eg- after logging in to the app I would like to go to the survey page if I am not an existing user of the app .
    - **Tasks:**
        - Spotify API data storage backend (5 story points)
        - Add remaining things to the model.js (5 story points)
        - Complete entire navigation (5 story points)
        - Make all styles constant (5 story point)
- As a person I would like to have a matches page that displays all the matches which include their social media such that I can contact them if I am interested in them.
    - **Tasks:**
        - Matches second version (8 story points)
        - Prototype compatibility algorithm (5 story points)
- As a person I would like to be able to logout and login to the Spotify Match App such that the app can store my information whether I'm logged in or not.
    - **Tasks:**
        - Create logout feature (5 story points)
- As a person I would like to have my age displayed on my matches card so people can see my age when they are swiping through the profiles.
    - **Tasks:**
        - User card DOB issue along with pictures (5 story points)
        - Profile questions backend (8 story points)
        - Interests backend completion (5 story points)

<u>**Team Roles:**</u>

- Rami
    - Create logout feature
    - Add remaining things to the model.js
- Amaan
    - Fix NPM package dependency issues
    - Profile questions backend
- Amandeep
    - User card DOB issue along with pictures
    - Homepage integration with backend
    - Interests backend completion
- Vani
    - Complete entire navigation
    - Matches second version
- Mrin

- ○ Make all the styles constant
- ○ Prototype compatibility algorithm
- ● Calder
  - ○ Spotify API data storage backend
  - ○ Prototype compatibility algorithm

Initial Task Assignment

- ● Rami -
  - ○ User Story:
    - ■ As a person I would like to be able to logout and login to the Spotify Match App such that the app can store my information whether I'm logged in or not.
    - ■ As a person, I would like to navigate from one screen to another. Eg- after logging in to the app I would like to go to the survey page if I am not an existing user of the app .
  - ○ Task:
    - ■ Create logout feature
    - ■ Add remaining things to the model.js
- ● Amaan -
  - ○ User Story
    - ■ As a person I would like to have my age displayed on my matches card so people can see my age when they are swiping through the profiles.
  - ○ Task:
    - ■ Fix NPM package dependency issues
    - ■ Profile questions backend
- ● Amandeep -
  - ○ User Story
    - ■ As a person I would like to have my age displayed on my matches card so people can see my age when they are swiping through the profiles.
  - ○ Task:
    - ■ User card DOB issue along with pictures
    - ■ Homepage integration with backend
    - ■ Interests backend completion
- ● Vani -
  - ○ User Story
    - ■ As a person, I would like to navigate from one screen to another. Eg- after logging in to the app I would like to go to the survey page if I am not an existing user of the app .
    - ■ As a person I would like to have a matches page that display all the matches which include their social media such that I can contact them if I am interested in them.
  - ○ Task:
    - ■ Complete entire navigation
    - ■ Matches second version
