Sprint 3 Report, Spotify Match, 2/28/2023

Actions to stop doing:
- We are satisfied with what we are currently doing as we all met our goals for this sprint. Some of the tasks were difficult but we were able to complete them and further develop our product.

Actions to start doing:
- We have quite a lot of tasks pending to work on for the next sprint, so we might need to start communicating a little more with each other to make sure everything is on track and no one is blocked with their task.

Actions to keep doing:
- We will keep meeting at the frequency we are meeting, and we will continue the style of work that we have had so far as it's been successful, as evidenced by this last sprint.
- We should continue having more brainstorming sessions so that the very best and ideal ideas come out for our product.

Work completed/not completed:
- We completed all the work that we set for the sprint.
    - Create models and connect to backend
    - User cards with swiping feature
    - Merging pages / views together
    - Sending data from the Spotify login page to the server
    - Adding / changing tables to the database and other required backend tasks
    - Using the Spotify API to get all the required data for compatibility

Work completion rate:
- All tasks completed for this sprint.
