Sprint 4 Report, Spotify Match, 2/28/2023

Actions to stop doing:
- We are satisfied with what we are currently doing as we all met our goals for this sprint. Some of the tasks were difficult but we were able to complete them and further develop our product. We are now done with all of our implementations for our product.

Actions to start doing:
- We need to start working on the presentation.

Actions to keep doing:
- We will keep meeting at the frequency we are meeting, and we will continue the style of work that we have had so far as it's been successful, as evidenced by this last sprint.
- We should continue having more brainstorming sessions for giving the best possible presentation so that the very best and ideal ideas come out for our product.

Work completed/not completed:
- **We completed all tasks in our sprint:**
    - User card DOB issue along with pictures
    - Complete entire navigation
    - Make all the styles constant
    - Adding the remaining things to the model.js
    - Profile questions backend
    - Matches backend completion
    - Homepage integration with backend
    - Matches second version
    - Interests backend completion
    - Installation instructions
    - Question re-rendering
    - Percentage breakdown pop up
    - Spotify API data storage backend
    - Fix NPM package dependency issues
    - Create logout feature
    - Prototype compatibility algorithm
    - Prototype Know Problems Report
    - System and Unit Test Report
    - Unit testing for react native

Work completion rate:
- All tasks completed for this sprint.
